## Radiative Forcing of Water Vapour and its Use in Climate Models

*Antero Ollila*

*School of Engineering (Emer.), Aalto University, Espoo, Finland*

### Corrigendum

In Ollila (2025) there is a spelling error in the manuscript.

Equation (2) in the corrected form is:

$$RF = -60.01 + 18.435 * \ln(H_{TPW}) \text{ [Wm}^{-2}\text{]} \quad (2)$$

This error has had no impact on the results since the right form of equation (2) has been applied in the calculations.

Submitted 2024-01-11, Accepted 2024-02-01. <https://doi.org/10.53234/SCC202603/07>
